

USB Type-C® Cable Logo Usage Guidelines

This document provides information pertaining to the USB Type-C® Cable Logos.

Logo Usage Guidelines for Hi-Speed USB and Certified USB Chargers can be found [here](#).

Logo Usage Guidelines for USB 80Gbps, 40Gbps, 20Gbps, 10Gbps and 5Gbps Performance Logos can be found [here](#).

USB-C® to USB-C® Cable Logo Requirements

All USB-C® to USB-C cables are required to use the USB-IF approved cable logo on the cable in the form of either being embossed on the over mold or printed on the overmold

In order to pass through the USB-IF Compliance Program, all USB-C® to USB-C cables must be labeled using the appropriate data rate and power wattage cable logo. For example, a USB 20Gbps cable that supports 20V at 3A must be marked with the Combined Performance and Power 20Gbps/60W logo.

While USB 2.0 Type-C® 240W and 60W cables that delivers data at up to 480Mbps, this data performance capability is not required to be included on the cable and is not reflected in the charging logos.

The USB-IF requires that all cables must be labeled with the correct markings prior to submission for compliance testing so that testing can confirm the intended display of such icons/logos. These markings must be checked before compliance testing can begin.

Welcome to the USB Type-C® Cable Logo Usage Guidelines.

Improving the customer's USB experience with clear performance and power certified logos.

Industry demand has led the Universal Serial Bus (USB) to grow beyond its original intent to connect peripherals to PCs and is now a dominate standard in the interconnect market. USB can be found everywhere from PCs to consumer electronics to mobile devices. Because of its ease of use, speed and expandability, USB is the preferred connection for many consumers. This presents a continued market opportunity for the future.

In order to realize this opportunity, USB products must continue to enhance the consumers' experience through high quality and ease of use. That's why USB Implementers Forum, Inc. (USB-IF) developed trademark-protected USB Type-C® Cable Power Rating 240W, 60W, and Combined Power/Performance Packaging Logos and Cable Logos for use by qualified parties. To qualify for the right to display these logos, products must pass the specified USB-IF compliance testing for product quality.

*USB 2.0 Type- 60W and C® 240W cables deliver data at up to 480Mbps, however, this performance capability is not required to be included and is not reflected in this logo.

USB Type-C® Cable Logos at a glance

USB Type-C® Cable Combined Power/Performance Packaging and Cable Logos

USB 2.0 Type-C® Cable Packaging Logos and Cable Logos *

To maintain the integrity of the USB Type-C® Cable Logos, all Guidelines must be followed. Refer to this page and the following sections for a complete understanding of how to use the USB Type-C® Cable Logos.

Your Brand in Relation to USB Logos

Your company name, logo, or product name must appear on any products or related materials where the USB Type-C® Cable Combined Power and Performance Packaging Logos and USB 2.0 Type-C® 240W and 60W Cable Logos are used. The Logos cannot be larger or more prominent than your product name, trademark, logo, or company name.

USB Logo Usage Certification Requirement

As stated in Section 2 of the USB-IF Trademark License Agreement, a Certified USB-IF logo may be used solely in conjunction with a product that has been submitted to and passed the USB-IF Compliance Testing Program and are included on the USB-IF Integrators List. The company also must have a valid USB-IF Trademark License Agreement on file. USB-IF Certified Logos cannot be used generically on your website or product packaging, collateral, advertisements, or manuals.

Important: Please refer to the USB-IF Trademark License Agreement Mark Requirements Chart for details regarding the USB-IF Test Procedures and other requirements.

USB Logos Must Not Be Altered

You must use the logos exactly as they are shown in the USB-IF digital artwork files; you may not imitate the USB Type-C® Cable Power Rating Packaging and Cable Logos in any of your materials.

USB Logos May Not Be Used as a Design Feature

The USB Type-C® Cable Power Rating Packaging and Cable Logos may not be used as a design feature on any of your materials.

USB Logos Can Not Be Combined with Any Other Feature

You may not combine USB Type-C® Cable Power Rating Packaging and Cable Logos with any other feature, including other marks, words, graphics, photos, slogans, numbers, design features, or symbols.

Word Mark and Trademark Attribution Statement

USB-IF Word Mark

“USB4[®]”, “USB Type-C[®]”, “USB-C[®]” and “USB 2.0 Type-C[®]” are a registered trademarks of USB Implementers Forum and are only for use with products based on and compliant with the USB Type-C[®] specification.

The trademark notice symbol [®] must be included in the first instance of “USB Type-C[®]” or “USB-C[®]” in any material. USB Type-C[®] and USB-C[®] should not be translated into languages other than English.

Trademark Attribution Statement

The trademark attribution statement should be included in any materials using the word mark “USB Type-C[®]” and/or “USB-C[®]”

USB Type-C® Cable Combined Performance and Power Rating Packaging Logos

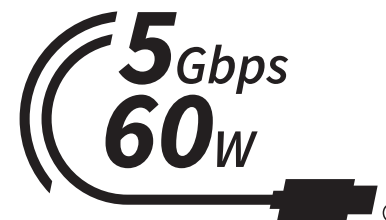

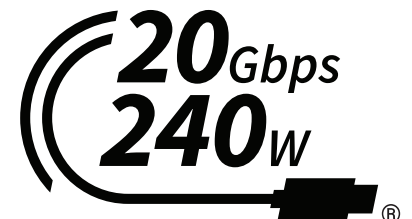

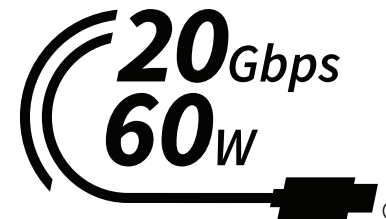

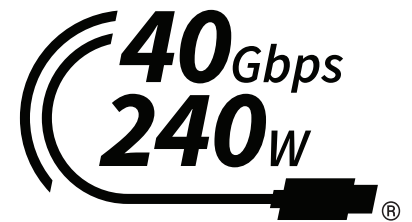

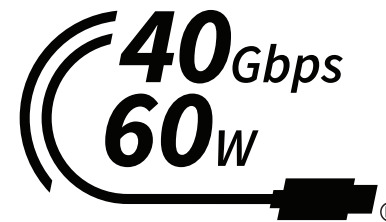

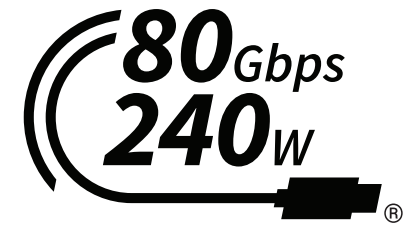

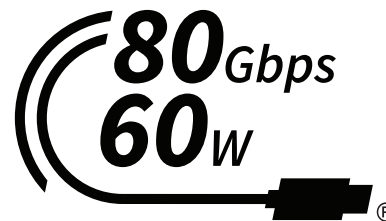

The USB Type-C® Cable Combined Packaging Logo must be used solely in conjunction with a USB Type-C® cable. The logo must indicate the cable's power rating (i.e. 240W or 60W) and signaling capabilities (i.e. 80 Gbps, ect.) for a cable that has been submitted to and passed the USB-IF Test Procedure for USB Power Delivery 3.2 Standard Power Range and USB Type-C® cables, and that has been posted on the USB-IF Integrators List.

The USB Type-C® Cable 60W/5Gbps Combined Packaging Logo may be reproduced only in the versions shown in this document and may not be altered in any way. Please note that the trademark (®) and the word “certified” are integral parts of the Logos. They are considered part of the Logo art and should not be altered in any way. The Logos must be reproduced from the USB-IF digital artwork files.

USB Type-C® Cable Combined Performance and Power Rating Logos

The USB Type-C® Cable Combined Performance and Power Rating Logo must be used solely in conjunction with a USB Type-C® cable. The logo must indicate the cable's power rating (i.e. 240W or 60W) and signaling capabilities (i.e. 80 Gbps, etc.) for a cable that has been submitted to and passed the USB-IF Test Procedure for USB Power Delivery 3.2 Standard Power Range and USB Type-C® cables, and that has been posted on the USB-IF Integrators List.

USB 2.0 Type-C® Cable Power Rating Packaging Logos

The USB 2.0 Type-C® Cable Power Rating Packaging Logo must be used solely in conjunction with a USB 2.0 Type-C® cable. The logo must indicate the cable's power rating (i.e. 240W or 60W) that has been submitted to and passed the USB-IF Test Procedure for USB Power Delivery 3.2 Standard Power Range and Hi-Speed USB Type-C® cables, and that has been posted on the USB-IF Integrators List.

The USB 2.0 Type-C® Cable Power Rating Packaging Logo may be reproduced only in the versions shown in this document and may not be altered in any way. Please note that the trademark (®) and the word “certified” are integral parts of the Logos. They are considered part of the Logo art and should not be altered in any way. The Logos must be reproduced from the USB-IF digital artwork files.

USB 2.0 Type-C® Cable Power Rating Logos

The USB 2.0 Type-C® Cable Power Rating Logo must be used solely in conjunction with a USB 2.0 Type-C® cable. The logo must indicate the cable's power rating (i.e. 240W or 60W) that has been submitted to and passed the USB-IF Test Procedure for USB Power Delivery 3.2 Standard Power Range and Hi-Speed USB Type-C® cables, and that has been posted on the USB-IF Integrators List.

USB Type-C® Cable Combined Performance and Power Rating Packaging Logos

These requirements apply to use of the USB Type-C® Cable Combined Performance and Power Rating Packaging Logo and must be followed. They are intended to establish a consistent, scalable logo that meets a variety of usage needs without distorting the logo.

Minimum Clear Space

Avoid visual clutter by maintaining a minimum amount of clear space around the Logo that is equal to 1/2 the height of USB letters (X) in the Logo.

Minimum Size for Print

The minimum width is 1 inch (25.4 mm).

Minimum Size for On-Screen

The minimum width of the Logo is 82 pixels.

Logo Alignment

To align the Logo correctly with margins or other elements, use the top and left edge of the circular arc.

Minimum Clear Space Example

Minimum Size for Print Example

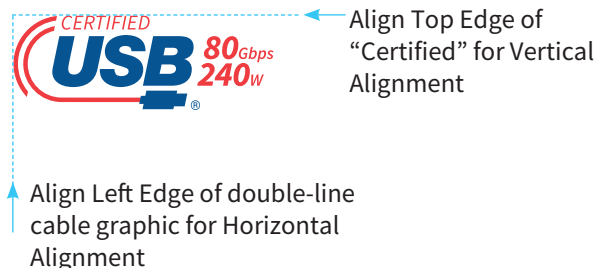

Minimum Size for On-Screen Example

Minimum Size includes the logo Clear Space, indicated by the blue margin.

Logo Alignment Example

USB Type-C® Cable Combined Performance and Power Rating Logos

These requirements apply to use of the USB Type-C® Cable Combined Performance and Power Rating Logo and must be followed. They are intended to establish a consistent, scalable logo that meets a variety of usage needs without distorting the logo.

Clear Space

Avoid visual clutter by maintaining a minimum amount of clear space around the Logo that is equal to the height of cable end device (X) for the size selected.

Minimum Size

The minimum size of the largest dimension of the Logo is 0.25 inches (6.35mm).

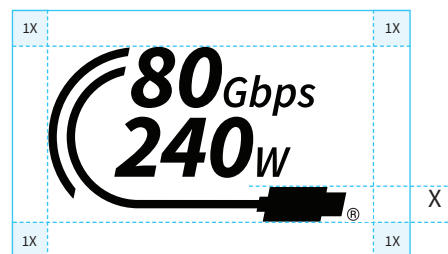

Logo Orientation

The Logo can be oriented horizontally or vertically.

Please Note: The USB Type-C® Cable Combined Performance and Power Rating Logo is only to be used on USB Type-C® cables.

Licensee is not obligated to use the “®” and may omit the trademark symbol on the USB Type-C® Cable Combined Performance and Power Rating Logo, for which the Licensee is printing/engraving on the cable over mold where the reasonable alternatives for the location and size of the Logo do not allow for the symbol to have a maximum dimension of 15mm or more. This permission is limited only to these exact situations.

Where the symbol is so omitted, the manufacturer/Licensees must include the following statement in their user’s manual/printed materials accompanying the cable similar to this example: “The USB Type-C® Cable 80Gbps/240W Combined Logo is a trademark of USB Implementers Forum, Inc.” and must be accompanied with the image of the mark with the correct rendering of the “®”.

USB 2.0 Type-C® Cable Power Rating Packaging Logo

These requirements apply to use of the USB 2.0 Type-C® Cable Power Rating Packaging Logo and must be followed. They are intended to establish a consistent, scalable logo that meets a variety of usage needs without distorting the logo.

Licensee is not obligated to use the “®” and may omit the trademark ® symbol on the USB 2.0 Type-C® Cable Power Rating Logo, for which the Licensee is printing/engraving on the cable over mold where the reasonable alternatives for the location and size of the Logo do not allow for the symbol to have a maximum dimension of 15mm or more. This permission is limited only to these exact situations.

Where the symbol is so omitted, the manufacturer/Licensees must include the following statement in their user’s manual/printed materials accompanying the cable similar to this example: “The USB 2.0 Type-C® Cable 240W Logo is a trademark of USB Implementers Forum, Inc.” and must be accompanied with the image of the mark with the correct rendering of the ®.

USB Type-C® Cable Packaging Logo Color Formulas

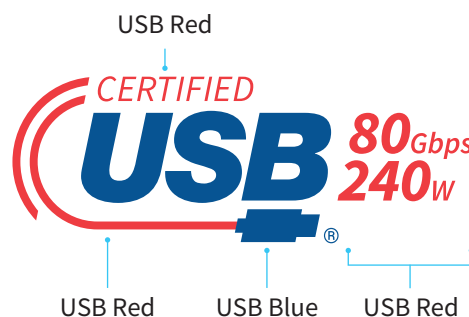

These requirements apply to use of the USB Type-C® Cable Packaging Logo and must be followed. These color formulas apply to all USB Type-C® Cable Combined Power and Performance Packaging Logos and USB 2.0 Type-C® 240W and 60W Cable Packaging Logos

The USB Type-C® Cable Packaging Logos have been created as a 2-color Logo. It is best to reproduce the Logo using the PANTONE® numbers shown at the right. When reproducing these colors in 4-color process inks, or on-screen (RGB), the screen tints listed here should be used.

Different color models may reproduce the USB Red and USB Blue with slight color variations, e.g., a Logo printed using USB Red as a spot color may result in a slightly different hue of red when compared to one printed using 4-color process or compared to an on-screen (RGB) Logo.

PANTONE Colors displayed here may not match PANTONE-identified standards. Consult current PANTONE Color Publications for accurate color. PANTONE® is the property of Pantone, Inc.

Example: USB Type-C® Cable 80Gbps/240W Combined Packaging Logo Colors

USB Red

PMS
PANTONE® 185C

CMYK
C0 - M91 - Y76 - K0

RGB
R235 - G0 - B41

USB Blue

USB Type-C® Cable Packaging Logo Color Versions

Two-Color Logo

The 2-color version is the preferred version of the USB Type-C® Cable Packaging Logo.

Two-Color Logo

USB Red PANTONE® 185C
USB Blue PANTONE® 653C

One-Color Logo

The 1-color, black version of the USB Type-C® Cable Packaging Logo should be used for single-color applications.

One-Color Logo

Black

Reversed Logo

The reversed version of the USB Type-C® Cable Packaging Logo should be used on dark backgrounds and over photography. When placed over photography make sure to use photographs that have enough tone to support the Logo and don't prohibit legibility.

Reversed Logo

On dark-colored background

Note:

PANTONE Colors displayed here may not match PANTONE-identified standards. Consult current PANTONE Color Publications for accurate color. PANTONE® is the property of Pantone, Inc.

USB Type-C® Cable Packaging Logos Improper Usage

Proper use of the USB Logos strengthens their effectiveness each time they are seen. The following examples depict unacceptable uses of the USB Logos for both print and on-screen applications.

You must use the Logos exactly as they are shown in the USB-IF digital artwork files. No alterations are permitted.

- 1 Don't place the Logo on a busy background.
A busy background would not follow the clear space guidelines, spelled out earlier in this document.
- 2 Don't change the colors of the Logo.
- 3 Don't use any version of the Logos without the "double-line cable graphic."
- 4 Don't use the Logo without the trademark ® symbol.
- 5 Don't use the Logo without the word "CERTIFIED".
- 6 Don't use the USB Type-C® Cable Combined Packaging Logos (i.e. 80Gbps/240W, etc.) without their power rating and/or speed indicators.

Including USB Type-C® Cable Logos on Various Materials

Incorporating the USB Type-C® Cable Combined Power and Performance Packaging Logos and USB 2.0 Type-C® 240W and 60W Cable Logos into your packaging, marketing materials, advertisements and manuals strengthens your marketing efforts by informing your consumers of the USB compatibility of your product(s). The following pages show samples of various marketing materials and examples of the USB Logo placement.

Examples shown on this page can only be used in correlation with a product that has been certified by the USB-IF and met the specific certification requirements. Any use of the logo must follow the appropriate guidelines for the USB Type-C® product as defined in these guidelines.

USB Type-C® Cable Logos Layout Examples

Packaging Example

Collateral and Advertising Example

Manuals Example

USB Type-C® Cable Packaging

Packaging is printed in a variety of ways. Coarse printing, such as flexography on corrugate or screen printing on various materials, may benefit from using the 1-color or the reversed Logo. Product that is printed using finer printing methods, such as 4-color process, can choose any Logo that best fits its Product box's design. The goal is to choose the Logo that will reproduce most attractively onto the material upon which it is being printed.

The example shown on this page can only be used in correlation with a product that has been certified by the USB-IF and met the specific certification requirements. Any use of the logo must follow the appropriate guidelines for the USB Type-C® product as defined in these guidelines.

USB Type-C® Rating Collateral and Advertisements Examples

Collateral

Where you are not restricted by color, the full-color Logo can be used for your print material. In situations where color is restricted, use the 1-color or reversed versions of the Logo.

One-Color Advertisements

For 1-color newspaper advertisements, use the black or reversed version of the Logo.

Full-Color Magazine Advertisements

Full-color magazine ads may use the 1-color, reversed or full-color versions of the Logo, choosing the Logo that works best with the design of the ad.

Examples shown on this page can only be used in correlation with a product that has been certified by the USB-IF and met the specific certification requirements. Any use of the logo must follow the appropriate guidelines for the USB Type-C® product as defined in these guidelines.

Full-Color Magazine Advertisement

USB Type-C® Cable Manuals

The manufacturer/Licensees must include the following statement(s) in their user's manual/printed materials accompanying the Product:

Statement 1

"The USB Type-C® Cable 80Gbps/240W Combined Logo is a trademark of USB Implementers Forum, Inc."

Statement 2

"The USB Type-C® Cable 40Gbps/240W Combined Logo is a trademark of USB Implementers Forum, Inc."

Statement 3

"The USB Type-C® Cable 20Gbps/240W Combined Logo is a trademark of USB Implementers Forum, Inc."

Statement 4

"The USB Type-C® Cable 5Gbps/240W Combined Logo is a trademark of USB Implementers Forum, Inc."

Statement 5

"The USB Type-C® Cable 80Gbps/60W Combined Logo is a trademark of USB Implementers Forum, Inc."

Statement 6

"The USB Type-C® Cable 40Gbps/60W Combined Logo is a trademark of USB Implementers Forum, Inc."

Statement 7

"The USB Type-C® Cable 20Gbps/60W Combined Logo is a trademark of USB Implementers Forum, Inc."

Statement 8

"The USB Type-C® Cable 5Gbps/60W Combined Logo is a trademark of USB Implementers Forum, Inc."

Statement 9

"The USB Type-C® Cable 240W Logo is a trademark of USB Implementers Forum, Inc."

Statement 10

"The USB Type-C® Cable 60W Logo is a trademark of USB Implementers Forum, Inc."

The statement(s) must be accompanied with the proper USB Type-C® Cable Combined Power and Performance Packaging Logos and USB 2.0 Type-C® 60W and 240W Cable Logos image of the mark(s) with the correct rendering of the (®).

The example shown on this page can only be used in correlation with a product that has been certified by the USB-IF and met the specific certification requirements. Any use of the logo must follow the appropriate guidelines for the USB Type-C® product as defined in these guidelines.

Manual Example

Trademark statement with correct rendering of the "®" and Logo

USB Type-C® Cable Logos Digital Formats

The following USB Type-C® Cable Logos are available in digital file formats:

- USB Type-C® Cable Combined Performance and Power Rating
- USB 2.0 Type-C® Power Rating and Packaging Logos and Cable Logos

Print Applications

Encapsulated Postscript (EPS) files were created in Adobe* Illustrator* and can be reproduced at any size without compromising quality. Use these versions for printing. Each version is a separate file. Logos can be printed using either PANTONE® colors or the 4-color process mix specified on page 6. Type has been converted to outlines; no fonts are required to reproduce the Logos. The files have been saved for both Macintosh* and PC.

On-Screen Applications

These versions are for on-screen applications such as the Web or Microsoft* PowerPoint* presentations. They have been created in RGB color mode and should not be used for offset printing. These versions were rasterized in Adobe* Photoshop* from Adobe Illustrator files (with the exception of the EPS files). Keep in mind that these files look their best when placed at 100% size, or smaller.

PNG and or JPG files are provided for use in on-screen applications.

EPS files were created in Adobe* Illustrator* and are saved in RGB color format. These files are to be used in software applications that utilize vector-based artwork, e.g., Adobe* Flash*.

* Third-party names and brands are the property of their respective owners. PANTONE® is the property of Pantone, Inc.
